WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Saw 660 long from 40 bar; chamfer both ends 1 x 45 with a file.

Mark from the rear end: rear bush at 40, chain 1 sprocket at 185, front bush at 330, chain 2 sprocket at 480, torque tube bush 495 to 590, pivot tube plug 600 to 660.

Drill 6 mm cross holes for the roll pins through each sprocket hub with the sprocket on the bar (drill through hub and bar together).

Polish the bush and plug lengths with fine emery; no ridges.

Fits: turns in two flanged bushes in the tower; carries the arm frame and the pivot tube plug on its front end.

Check: turns freely by hand in both bushes with the tower bolted.
