WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Ratchet: 24 teeth on a 120 circle, roots on a 104 circle, from 8 plate.
Mark with a printed template; saw and file each tooth: steep face toward the way the reel would run back. Weld a 44 boss, bore 30.
Pawl: 8 plate, 50 long, with a 12 hole; its tip sits in a tooth root.
Pin: 12 bar through the rear plate, welded to the pawl, with a release lever outside the cover; spring holds the pawl in.
Cover: 1.5 sheet box 175 x 170 x 52 over wheel and pawl, with holes for the crank shaft and the pin; 4 M6 into the rear plate.
Fits: wheel pinned on the crank shaft just behind the rear plate.
Check: crank turns one way only; lever lifts the pawl clear.

VATREEL

github.com/BoujeeEnjinia1701/vatreel

VatReel: ratchet, pawl and cover (make 1 set)
