WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Member 1: 390 of SHS; member 2: 265 of SHS, welded at a right angle at one end of member 1, pointing toward the pit.

Two fork plates 115 x 66 x 8 under the end of member 2, 50 apart inside, each with a 16.5 hole 26 up from the bottom, in line.

Member 1 lies on the tower top plate: two 10.5 holes 100 apart.

Weld all round; full fillets on the fork plates (screw load 3.8 kN).

Fits: bolts on the tower top with 2 M10; the upper trunnion block hangs between the fork plates on two 16 pins.

Check: the two fork holes line up with a 16 bar through both.
