WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Saw 1205 long; deburr inside and out.
Plug: a 304 ring 49 outside, 70 long, holding a UHMW bush bored 40; push it into the near end flush and plug weld through three 8 holes.
At the far end drill 10 cross holes at 100 pitch for the extension pin, the first 30 from the end, five holes in all.
Slide on the 68 inner collar before the arm frame (sheet 112).
Fits: the plug slides onto the jackshaft tip; the arm frame's far bush turns on this tube; the extension slides inside it.
Check: the extension tube slides in by hand its whole length.
