Scale 1:10; looking at the right side (along -X)

WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Two side plates: outline of a 112 circle and a 250 circle with centres 900 apart, joined by straight tangents (print a template).
Holes: outer plate 44 at the small end; inner plate 44 and 52.
Rim strip 34 wide, bent round the outline by hand on a former, welded or riveted to both plates to make a closed case.
Two spacer tubes 16 x 58 at 300 and 600 from the small end on the inner plate, with M8 through bolts into the near arm.
Fits: closes chain 2 on all sides; the jackshaft and axle pass through its holes.
Check: chain 2 runs inside without touching the case.

VATREEL

github.com/BoujeeEnjinia1701/vatreel

VatReel: chain 2 guard (make 1)
