WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Tube 582 long; weld a 75 x 50 x 6 end plate on each end, square.

End plates: 2 x 10.5 holes matching the spoke tips.

Three eye tabs 30 x 22 x 6 (12 hole) on the outer side, at 100, 300 and 500 from the near end plate, for the snap hooks.

Grind welds smooth so hides and yarn do not snag.

Fits: bolted with 2 M10 A4 each end on the inner faces of the spoke tips; bars run parallel to the axle at 550 radius.

Check: all six the same length within 1.
