WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Rod 1500 long; bend a 60 hook at one end in a vice, smooth the tip.
Push a 120 PP handle on the other end and pin it.
Used from behind the shield to guide hides and hanks onto the bars
and to clip and unclip the snap hooks.
Stored on the back rail of the base frame.
Check: hook end smooth, no burrs that tear hides.

VatReel: loading hooks (make 2)
